This report describes changes to the Fund that occurred during the reporting period.

What were the Fund costs for the last six months? (based on a hypothetical \$10,000 investment)

Fund	Costs of a \$10,000 Investment	Percentage of a \$10,000 Investment ¹
Paradigm Value Fund	\$69	1.42%

¹ Annualized.

Management's Discussion of Fund Performance

The Fund decreased 4.94% in the first half of 2025, compared to a 3.16% decrease for its benchmark, the Russell 2000 Value Index. Since inception (January 1, 2003) on an annualized basis, the Fund has returned 11.33%, compared to 8.83% for the benchmark.

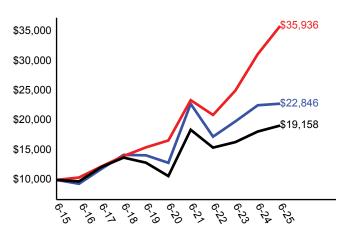

The Materials sector was the largest contributor to the portfolio in the first half of 2025. Our strong stock selection and overweight allocation in the Information Technology sector resulted in the sector being another positive contributor to the overall portfolio.

Health Care was the largest detractor to the portfolio in the first half of 2025 due to stock-specific challenges in the Health Care Equipment and Supplies industry. Secondarily there was underperformance in the Life Science Tools & Services industry driven by NIH research funding cuts that began in February and ensuing industry uncertainty.

How did the Fund perform over the past 10 years?

The Fund's past performance is not a good predictor of the Fund's future performance. The graph and table do not reflect the deduction of taxes that a shareholder would pay on fund distributions or redemption of fund shares.
